

Drainage Cells

In our extensive range of geosynthetic products, we also manufacture premium geo drain cells/drainage mats, available in varying sizes.

The most common and in-demand drainage cells are 13 mm flexo drainboard, 20 mm flexo drainboard, and 30 mm geo drain cell.

Function: Subsoil drainage.

Sector: Civic and landscaping, slopes and walls, coastal, rails, and roads.

Applications:

- Increase load capacity in areas with heavy use.
- Drainage mat provides slope and embankment stability
- Golf courses
- Sports fields
- Retaining walls
- Tunnels
- Perfect solution for roof gardens
- Planter boxes
- Podiums garden geo drain cell
- Green wall grass paver/drain cell for green grass used in landscaping.
